

Proposals - Context Views 1

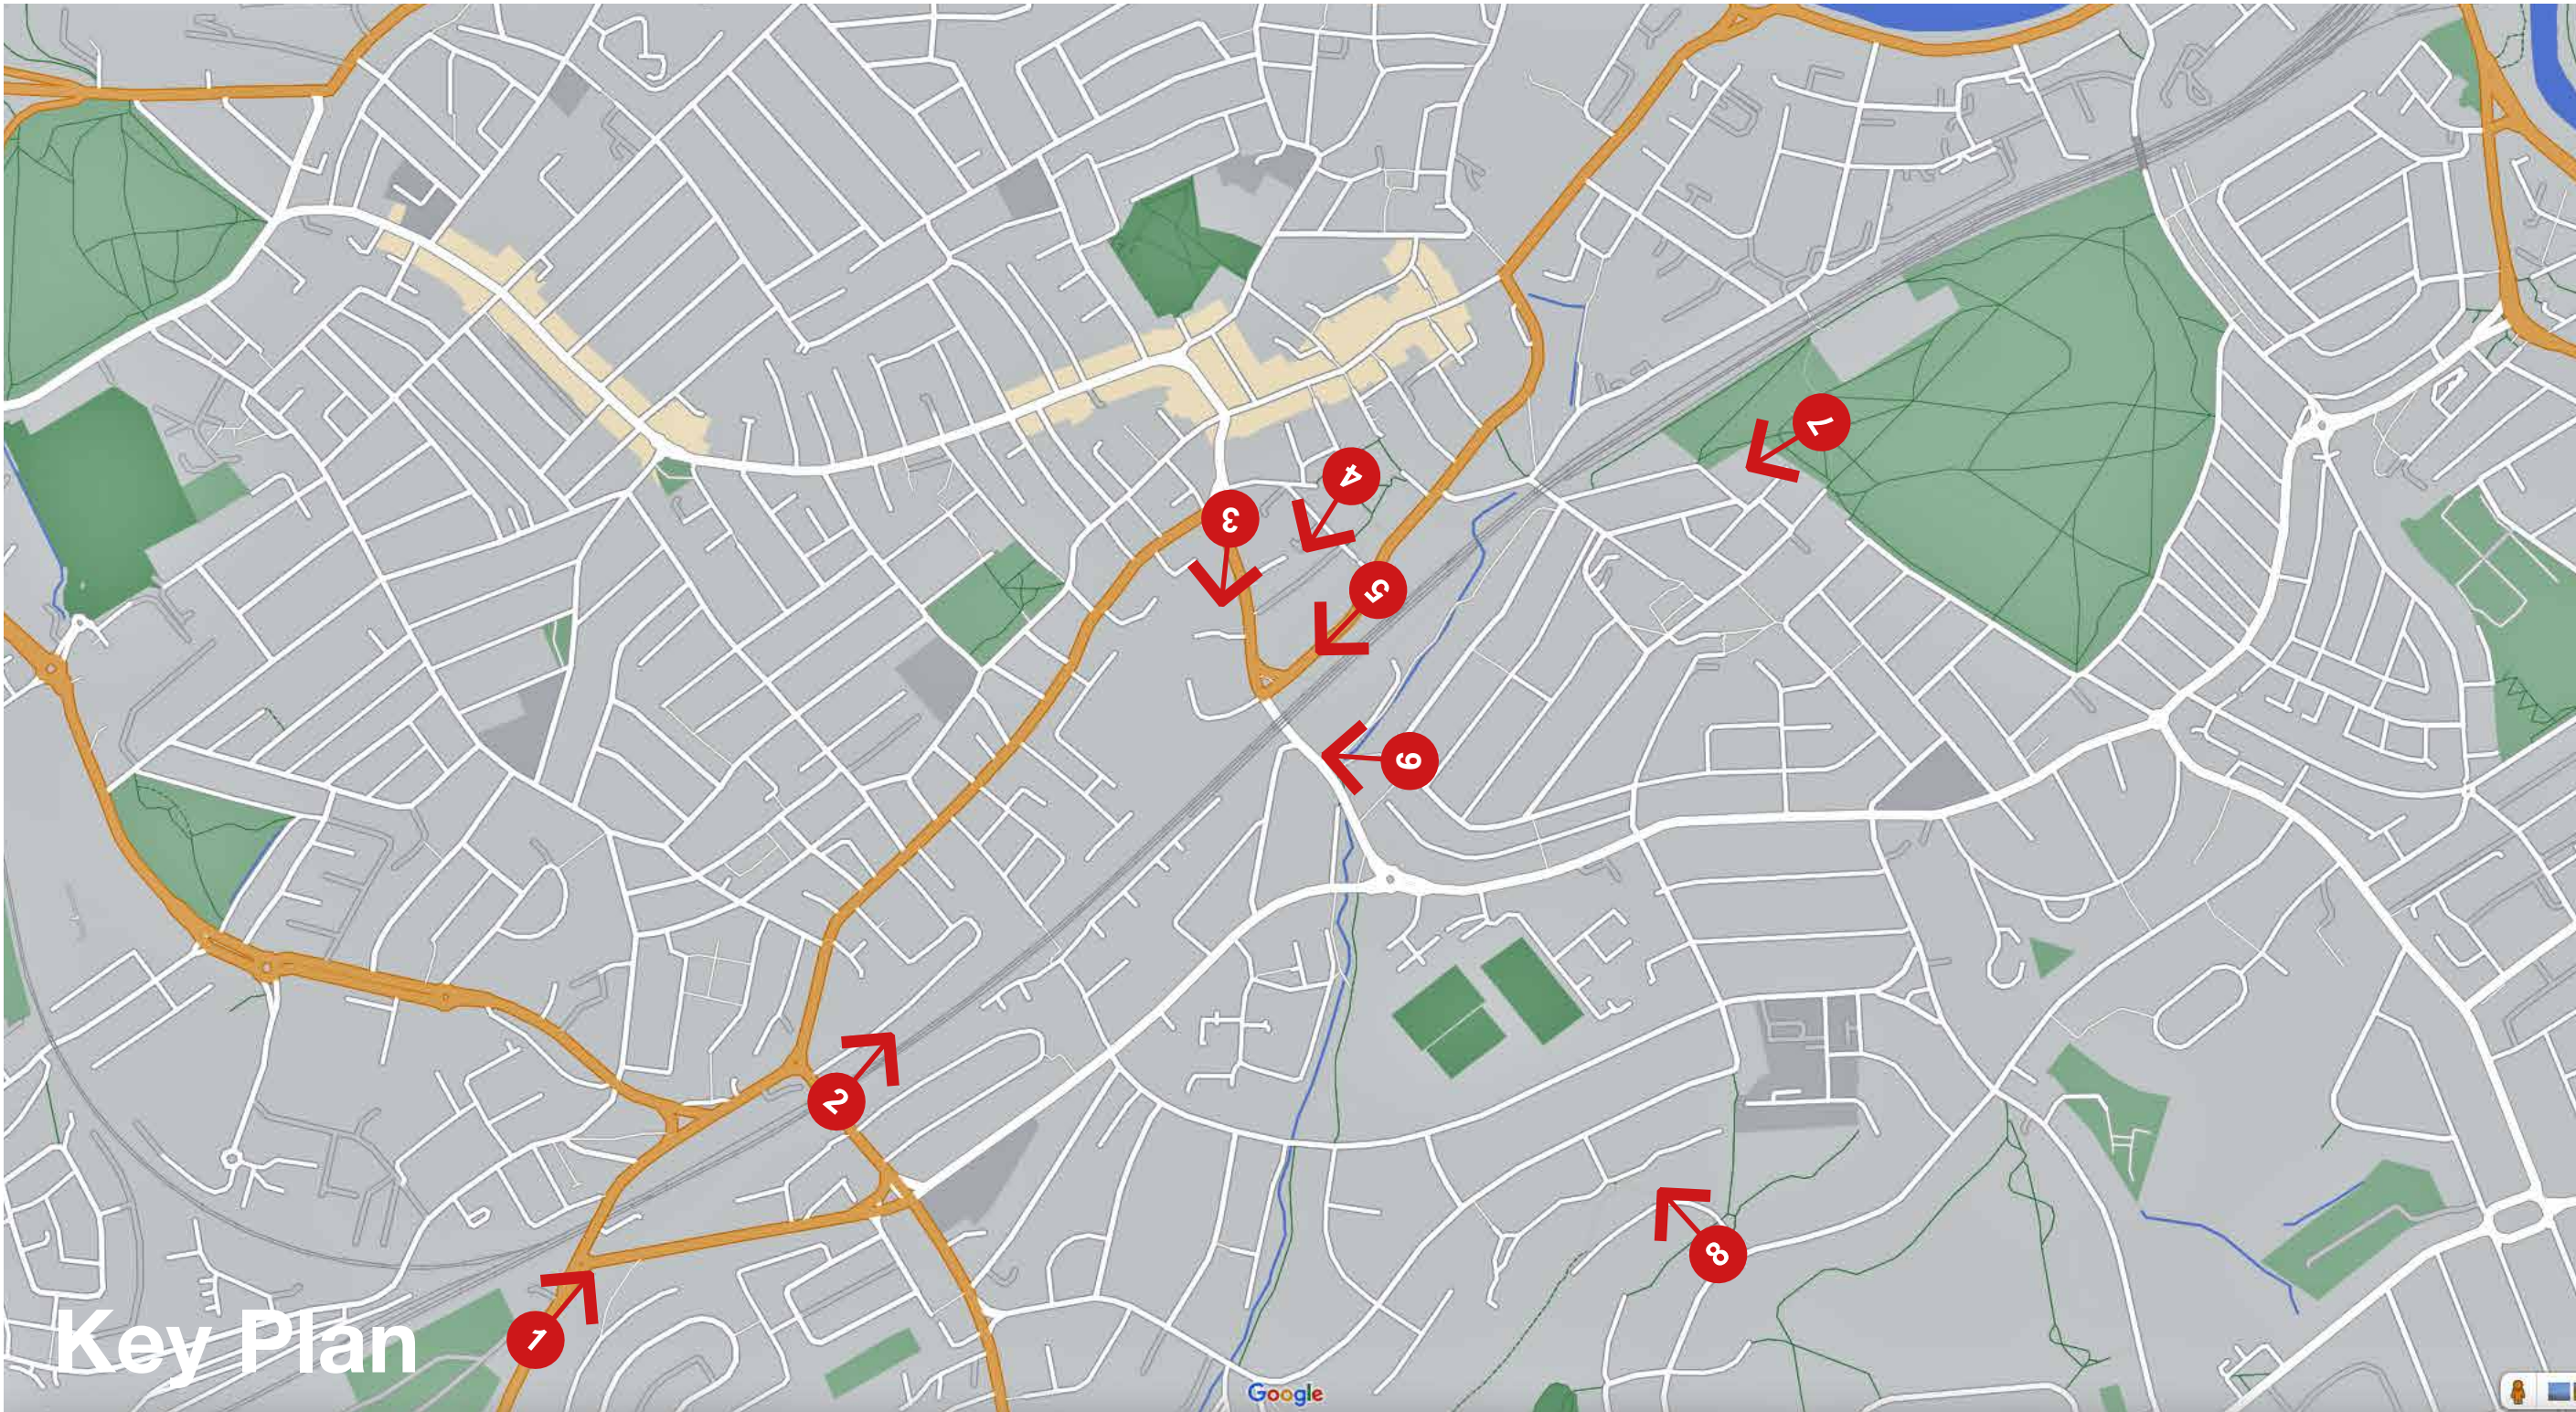

Context Views using Vu City

Using Vu City software, a model of both the proposed options has been prepared and inserted into the modelled context, in order to test and compare the overall massing and impact of the scheme as seen from key view points.

This panel shows photographs with views taken from a similar position as those illustrated using Vu City software for the purposes of comparing 'before and after'.

The images that follow are set out side by side comparing the two options from the same viewpoint (the proposals are modelled simply and rendered in red).

- View 1 From Hartcliffe Way
- View 2 From Parsons Bridge Station
- View 3 From near the Robinsons Building
- View 4 From St John's Burial Ground
- View 5 From Malago Road
- View 6 From Cotswold Road (Windmill Hill)
- View 7 From Victoria Park
- View 8 From Northern Slopes (Knowle)

New Housing at Sheene Way Bedminster
